Differentiators

- **Augments, never replaces** — every solution preserves and elevates human judgment; staff stay in the loop.
- **Proven, measurable outcomes** — real engagement data, not vendor projections.
- **Certified small & disadvantaged business** — eligible for set-aside and scoring consideration.
- **Transparent about stage** — completed past performance and active pilots are always clearly distinguished.
- **Built for regulated environments** — from M&A due diligence to healthcare incident reporting.

Company Overview

Architects of the Cloud builds **agentic AI systems** for government and enterprise teams. Our core offering — an AI-powered assessment and reporting harness — ingests unstructured documents and data, extracts what matters, and produces structured reports in hours instead of weeks, while keeping a human analyst in the loop for every judgment call.

Beyond the harness, we build voice-driven reporting systems, agentic workflow automation, and AI-generated video content — each designed on the same principle: **augment your staff, never replace them.**

Core Competencies

Agentic AI Assessment & Reporting Harness **LEAD OFFERING**

Document ingestion, extraction, and structured reporting — cuts review cycles from weeks to hours. Applications: compliance automation, audits, vendor evaluations, grant compliance monitoring.

Voice-Driven Reporting

Voice-first data capture that preserves full narrative instead of checkboxes; agentially detects and fills information gaps. Applications: field reporting, inspections, incident and investigation documentation.

Agentic Workflow Automation

AI agents execute multi-step administrative workflows with human review of exceptions and final decisions.

AI Video & Corporate Storytelling

AI-produced video for public communication, internal training, and workforce-recruitment campaigns.

AI Consultancy

Creating chatbots, AI systems, and AI agents to accelerate your processes.

Technical Certifications

- Microsoft Certified: Azure AI Engineer Associate
- Meta Certified Media Buying Professional
- Meta Certified Technical Implementation Specialist

Principal Experience & Past Performance

Engagements below were completed by Gerard E. Beaubrun, Principal of Architects of the Cloud, in an independent contractor capacity directly engaged by a Big Four professional services firm — presented as Principal / key personnel experience supporting Architects of the Cloud's capability.

Big Four Professional Services Firm — HR & Workforce Due Diligence Practice (3 separate engagements, each under 3 months, 5-person teams)

M&A Due Diligence Document Processing: Ingested and extracted data from virtual data rooms of 500–2,000 documents per engagement; generated deal agendas and data request lists.

Workforce & Labor Analytics: Combined employee census, BLS benchmarks, and in-market compensation data to assess target-company workforce positioning.

Microsoft — Marketing Material Advisory Chatbot: Built a conversational AI assistant that guides users to the right marketing materials based on their stated purpose and the outcome they are trying to accomplish.

Culture & Engagement Scoring: Synthesized census and public employee-review data into a structured measure of leadership trust, purpose, fairness, and growth opportunity — validated by practitioners as comparable to manual analyst review.

WAIK — Senior Living & Care Facility: Multi-tenant voice incident reporting, 50–200 residents, 20+ staff, MDS filing support.

Results: labor analytics and scoring tools reduced a ~2-week manual process to under 2 hours, adopted firm-wide within 2 months of deployment. WAIK pilot: administrators saved 5–10 hours/week, measured with real pilot staff.
